

BIKRAMJEET LADANIA

Senior Data Engineer

Kitchener, ON | (647) 618-1758 | www.linkedin.com/in/bikramjeet-ladania | Bikramjeetsingh@live.com

PROFILE

Experienced Senior Data Engineer with over 6 years of expertise designing and optimizing Azure based data solutions leveraging Databricks, Synapse Analytics, Data Factory, Fabric Analytics, and ETL frameworks. Skilled in building scalable data pipelines using Fabric Lakehouse (Medallion Architecture) and Data Lake for storage, processing with PySpark and Spark Notebooks, and performing analytics on Dedicated SQL Pools and Azure SQL Database. Adept at automating data workflows, applying advanced analytics, and collaborating cross-functionally to drive actionable insights and business value.

EDUCATION & CERTIFICATION

- | | |
|---|---------------------|
| • Fabric Analytics Engineer Associate | Aug 2024 – Aug 2026 |
| • Azure Data Engineer Associate | May 2022 – May 2026 |
| • Databricks Data Engineer Associate | Mar 2023 – Mar 2027 |
| • Databricks Data Engineer Professional | Oct 2024 – Oct 2026 |
| • DevOps Engineer Expert | Apr 2024 – Apr 2026 |
| • Generative AI Fundamentals | Jul 2023 – Jul 2025 |

Sheridan College, Brampton, ON

Sept 2015 – Dec 2018

Software Development and Network Engineering

- Awarded - High Honours

PROFESSIONAL EXPERIENCE

Adastra North America, Toronto, ON

Senior Data Engineer | SGI (Saskatchewan Government Insurance) Canada May 2022 - Present

Technology – Terraform, Synapse Analytics, SQL Pool, PySpark, Logic Apps, Azure Open AI

- Automated infrastructure provisioning by writing Terraform scripts to deploy Synapse Analytics platform
- Designed and implemented a scalable enterprise data ingestion framework, integrating multiple sources into the Data Lake and processing data through Integration and Consumer layers
- Developed an intelligent monitoring framework using Azure Logic Apps, enabling custom alerts to proactively detect issues and ensure the reliability and optimal performance of data pipelines
- Collaborated with business teams to understand auto insurance data, ensuring accurate integration data modeling to support enterprise-wide analytics

Solution Architect | SeaSpan Ship Management Ltd.

Aug 2024 – Nov 2024

Technology – Fabric Analytics, Lakehouse, Spark Notebook, SQL Database, Data Warehouse

- Designed and implemented a Medallion architecture to efficiently migrate IoT data from Azure SQL to Microsoft Fabric
- Developed and optimized Spark notebooks to ingest, clean, and transform IoT data, implementing a structured workflow to ensure seamless processing from Bronze to Gold layers in the Lakehouse
- Built and orchestrated end-to-end data pipelines using the data warehouse framework, automating workflows to ensure seamless, reliable, and efficient data movement and transformation

InvestorCOM Inc, Brantford, ON

Software Developer

Sep 2021 – Apr 2022

BIKRAMJEET LADANIA

Senior Data Engineer

Kitchener, ON | (647) 618-1758 | www.linkedin.com/in/bikramjeet-ladania | Bikramjeetsingh@live.com

Technology – C#, .NET Core, SQL, Azure Data Factory (ADF), Logic Apps, Durable Functions

- Develop, deploy and maintain Microservice APIs and web applications for various financial institutions
- Migrate on-prem ETL pipelines (including lift and shift) to ADF to streamline a scalable and robust universal solution
- Build workflows, write custom executables and scripts to process gigabyte+ volume of data stored in blob storage

Jr. ETL & Data Developer

Jul 2019 – Aug 2021

Technology – C#, VBA, SQL, Azure Storage, Azure VM, .Net Framework

- Built an ETL pipeline for data consolidation & address correction which has optimized the system performance by 43% and reduced the printing & mailing cost significantly
- Involved in importing and exporting data (MYSQL, Oracle, SQL Server, Data Warehouse, JSON, XML, CSV, XLS & Text) from local/external system to EDPP HDFS
- Automated and reduced manual data validation time by 80% through Windows Form application

Cogeco Peer 1, Etobicoke, ON

Data Analyst Co-op

May 2018 – Jan 2019

Technology – C#, Python, Azure SQL Database, SSIS, SSRS, Salesforce, CloudSense

- Built queries (SQL, PostgreSQL) and logic for audit, ETL and data warehouse linked servers
- Wrote custom scripts to manipulate the data from various sources for pre-defined schema
- Worked closely with EDA (Enterprise Database Architect) to push legacy data on Salesforce objects
- Supported existing batch and real-time data-streaming talend jobs by implementing optimized workflows

Finastra, Mississauga, ON

Quality Assurance Analyst Co-op

Sep 2017 – Jan 2018

Technology – C#, SSIS, SQL, Functions, Triggers, GIT/TFS

- Designed and implemented end-to-end data pipelines to extract, cleanse and load the data to Azure SQL database
- Developed SSIS packages and researched third party plugins by creating proof of concepts to reduce processing time
- Created, managed and deployed SSRS reports to internal servers for analyzing the progress of various phases of projects

West Corporation, Toronto, ON

Web Analyst Co-op

Jan 2017 – Apr 2017

Technology – ASP.NET, Java, Bootstrap, JavaScript, Azure Web Apps, Google Analytics, Selenium

- Developed responsive portfolio websites using HTML5, CSS, JavaScript and ASP.NET framework
- Implemented Google Analytics and SEO metadata to improve the ranking of websites in Google Search Engine
- Performed QA using selenium, deployed the sites on Web Apps and managed the traffic on deployment slots
